GlassCraft *Unfinished Wood Door* slabs and entryways are designed to create lasting value and beauty for your home, and this warranty is effective for all unfinished wood door slabs and systems manufactured by GlassCraft on or after **January 1, 2009** for use in the United States. We warrant that, subject to the conditions and exclusions stated below, each unfinished wood door or its glass panel or wrought iron grill will be free from defects in material and workmanship which would render the product unfit for normal and recommended use and service when correctly finished and installed in the continental USA. GlassCraft Door Company ("GlassCraft") warrants this product only to the first purchaser of the product for purposes other than resale, or to the original purchaser of the residence into which such door is installed. This warranty covers defects which become evident during the period outlined below, provided that the owner gives written or electronic notice of the defects to GlassCraft Door Company, 2002 Brittmoores, Houston, Texas 77043, within the applicable time period. This warranty constitutes the sole and exclusive warranty offered by GlassCraft Door Company: it is not transferable, and no dealer, distributor, or representative of GlassCraft has the authority to modify or expand this warranty.

Wood doors without factory finish

GlassCraft Door Company offers a limited warranty for one (1) year for all unfinished wood doors and/or entryways from the date of first purchase from GlassCraft of the product; this warranty assuring that product, for this period, is of good material and workmanship and free from defects that would render the product unserviceable or unfit for the ordinary, recommended use. The following shall not be considered defects in material or workmanship, and are not covered by this warranty:

1. Damage caused by improper finishing of the door or entryway; failure to comply with finishing, installation, maintenance, and warranty information provided by or available from GlassCraft, failure to perform normal homeowner maintenance, or by attempts other than by GlassCraft to repair the door. All 6 sides (front, back, edges, top and bottom) of the door must be properly finished and maintained.
2. Warp of up to ¼" in any plane of the door for any 6'8" tall door up to 36" wide. Warp of up to ½" in any plane of the door for doors taller than 6'8" and up to 8 foot tall and up to 42" wide. Doors wider and/or taller are not warranted against warp. Surface checks in the doors that are less than 1/8" in width or less than 2" in length are not warranted. A bow or nonalignment in the frame or jamb in which the door is hung is not covered.
3. Normal wear of the door, the natural variation in wood colors or texture, and the physical appearance of the door are not covered. Appearance or performance of a knot in any alder door is not covered.
4. Glass breakage or glass damage for any reason. The physical appearance of a glass panel is not covered by this warranty.
5. Rusting or metal deterioration or appearance of wrought iron.
6. Damage caused beyond the control of GlassCraft, including but not limited to damage caused by misuse, abuse, accident, or mishandling, or by fire, flood, earthquake, hurricane, storm, tornado, or other acts of nature. In addition, water penetration due to pressurized water application from a water hose or sprinkler systems is not covered. Leakage in any door around a "speakeasy" door opening is not covered. Or damage resulting from the installation of a storm door with the GlassCraft wood door.
7. Damage resulting from reducing the height of the door by removing more than 1" from the bottom rail and/or 1/2" from the top rail of the door or reducing the width of the door by removing more than 1/2" from either side edge.
8. Panel movement or shrinkage.
9. Damage resulting from exposure due to installation in an unprotected opening, such as an installation without sufficient roof overhang protection, which causes the door to be exposed to an excessive amount of direct sunlight and/or precipitation. Minimum sufficient roof overhang may be defined as a distance of not less than one-half of the height elevation measured from the bottom of the door to the bottom of the overhang at the point that the overhang is furthest from the door or entry. The width of the overhang and/or placement and size of entryway side walls are also very important to adequately protect the entryway. Depending upon the installation application, this overhang may need to be greater than this minimum overhang.
