
GlassCraft Door Company Introduces the Pricer – An Innovation on Simplicity and Function

GlassCraft Door Company introduces its new PRICER, a pricing engine that has ease of use and functionality at its core technology. Users on its website need to follow only 3 simple steps to get the product pricing they need, quickly and simply. First, users pick a door they like from any of the product catalogs, enter the correct product number on the data field, and click submit. The PRICER then generates the pricing, including different tiered pricing when applicable. The PRICER is also unique in its ability to show not just pricing information, but also the line drawing of the door they have chosen. This match up between pricing and image of the door configuration makes GlassCraft's PRICER an even more valuable tool.

The PRICER is part of GlassCraft's commitment to give its users and customers the highest level of service and buying experience.

Visit www.glasscraft.com to test the PRICER.
